SKILLS

- **Languages:** Python, C, C++, SQL, HTML/CSS, Js, Java
- **Tools/Platforms**: MySQL, Tableau, Power BI, Excel, Jupyter, Google Colab, AWS
- **Soft Skills**: Problem Solving, Analytical, Critical Thinking, Teamwork, Communication
- **Libraries:** Matplotlib, Pandas, NumPy, Scikit-Learn, TensorFlow, Seaborn
- **Domain Skills:** Data Cleaning, EDA, Statistical Analysis, Machine Learning, Data Visualization

EXPERIENCE

Student Explorer – Project Based Learning Aug23 - Present

- Built and implemented multiple hands-on projects in **Artificial Intelligence, Data Analytics, Cloud Computing, and Web Development** using Python and modern development frameworks to solve practical, real-world problems.
- Designed and developed **automation workflows and intelligent AI chatbots using Botpress**, focusing on improving user interaction, automating responses, and enhancing digital communication systems.
- Performed **data analysis using Python and SQL**, including data preprocessing, cleaning, and exploratory data analysis to extract meaningful insights and support data-driven decision making.
- Integrated **APIs and cloud-based services** to develop scalable applications, gaining practical experience in building efficient, data-driven solutions and deploying modern software systems.

PROJECTS

Exploratory Data Analysis on Census 2011 (EDA) | Project Aug 25 - Dec 25

- Performed **Exploratory Data Analysis (EDA)** on factors such as literacy rate, gender distribution, and workforce participation to identify meaningful patterns in the data.
- Applied **data preprocessing techniques** include data cleaning, handling missing values, and data transformation to prepare the dataset for accurate analysis.
- Extracted **actionable insights using statistical analysis and visualization**, helping to understand socio-economic indicators and demographic relationships within the dataset.
- Analyzed the **Census 2011 India dataset (20K+ rows)** using Python to study key demographic trends and population patterns.

Dress Up (Website) | Project Nov 25 - Dec 25

- Created a Developed **Dress Up**, a responsive web application that allows users to explore, mix, and organize different outfit combinations for better fashion planning. Integrating The Movie Database API to stream meta data for **10,000+ titles** with smooth playback handling.
- Designed and implemented an interactive and user-friendly interface using modern web technologies to provide a smooth and engaging user experience across devices.
- Focused on **responsive design and layout optimization** to ensure the website works efficiently on desktops, tablets, and mobile screens.
- Implemented structured front-end components and styling to enhance **usability, navigation, and overall visual appeal** of the application.

Scan Vault Project Link | Project June 25 - July 25

- Built a **serverless receipt processing pipeline on AWS** using S3, Lambda, Textract, DynamoDB, and SES to automatically process uploaded receipts.
- Implemented **OCR and automated data extraction** using Amazon Textract to capture key information from receipt images and store it in a structured format.
- Designed an **event-driven workflow** where S3 uploads trigger Lambda functions to process data, store results in DynamoDB, and send automated email notifications through SES.
- Configured **IAM roles, permissions, and service triggers** to ensure secure, reliability, and seamless end-to-end integration across AWS services.

CERTIFICATES

- OCI 2025 Certified Data Science Professional **|** Certificate — Oct 2025
- Cloud Computing AWS | Certificate — July 2025
- BCG X GenAI Job Simulation | Certificate — June 2025
- iHUB DivyaSampark @IIT Roorkee | Certificate — Sept 2024

EDUCATION

Lovely Professional University Punjab, India
Bachelor of Technology - Computer Science and Engineering: **CGPA: 7.3** Since August 2023

Kendriya Vidyalaya BEG Pune, Maharashtra
Intermediate**: 69%** April 2022 - May 2023

Army Public School Dighi Pune, Maharashtra
Matriculation**: 87%** April 2020 - March 2021
